

VOLUME 9 OF THE HAYMES COLOUR LIBRARY IS REVEALED -

# Blended Neutrals

## SHIFTING INTERPRETATIONS OF NEUTRALS

The latest palette release from Haymes Paint - Volume 9, Blended Neutrals was inspired by a trip to Milan, where Colour & Concept Manager, Wendy Rennie was impressed by a more colourful neutrals palette made up of peachy, flesh like tones and warm blues, a marked contrast to the more colourless neutrals seen in the past few years.

"I've developed this palette of nine neutrals to inspire, influence and engage consumers to use more colour in their homes. It's a palette that contains hints of pink, peach and blue, which contrast well with the greys, injecting life and soul to interior spaces."

"This more playful and relaxed approach to neutrals provides an opportunity for people to shift their approach from always using greys and whites to seeing how colour can be translated into making spaces warm, balanced and liveable," said Wendy.

"The hero colour of this palette, Siesta, a subtle peachy tone, can be used to create a relaxed and comfortable vibe in a bedroom, open plan living space or even a bathroom."

"What I love about this palette is that it creates a wonderful conversation around the definition of neutrals and how we can use them in our homes to create playful, unique and relaxed spaces," said Wendy.

Haymes Paint released its innovative new colour trends model - The Colour Library in 2016, which provides more regular updates on the latest colour stories and trends. The next release, Volume 10 will be launched in July this year.
